iı	and the second s		
6.	The modular transmitter must be labeled with its own FCC ID number, or use an electron display (see KDB Publication 784748).		
	If using a permanently affixed label with its own FCC ID number, if the FCC ID is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization.	⊠ - YES	□ - NO(*)
	If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 15.212(a)(1)(vi)		
	Details: < The modular transmitter is labelled with its own FCC ID. Labelling instructions for host demanual under chapter 'Compliance with FCC and IC Rules and Regulations'.>	evices are state	ed in the user
7.	The modular transmitter must comply with all specific rule or operating requirements applicable to the transmitter, including all the conditions provided in the integration instructions by the grantee. A copy of these instructions must be included in the application for equipment authorization. For example, there are very strict operational and timing requirements that must be met before a transmitter is authorized for operation under Section 15.231. For instance, data transmission is prohibited, except for operation under Section 15.231(e), in which case there are separate field strength level and timing requirements. Compliance with these requirements must be assured. 15.212(a)(1)(vii)	⊠ - YES	□ - NO(*)
	Details: < The modular transmitter complies with any specific rules or operating requirements. Instruuser manual>	ections are pro	ovided in the
8.	The modular transmitter must comply with any applicable RF exposure requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253(f) and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance in accordance with Section 15.247(b)(4). Modular transmitters approved under other Sections of Part 15, when necessary, may also need to address certain RF Exposure concerns, typically by providing specific installation and operating instructions for users, installers and other interested parties to ensure compliance. 15.212(a)(1)(viii)	⊠ - YES	□ - NO(*)
	Details: < The modular transmitter complies with RF exposure requirements. Please refer to MPE calinformation. (B19W50128-MPE).>	lculation for t	he exposure

ModularApprovalRequestLetter

Limited Module Description – When Applicable

* If a module does NOT meet one or more of the above 8 requirements, the applicant may request Limited Modular Approval (LMA). This Limited Modular Approval (LMA) is applied with the understanding that the applicant will demonstrate and will retain control over the final installation of the device, such that compliance of the end product is always assured. The operating condition(s) for the LMA; the module is only approved for use when installed in devices produced by grantee. A description regarding how control of the end product, into which the module will be installed, will be maintained by the applicant/manufacturer, such that full compliance of the end product is always ensured should be provided here.

Details: <example - N/A>

	Software Considerations – KDB 594280 / KDB 442812 (One of the following 2 items must be applied)			
Requirement		Requirement Met		
1.	For <u>non-Software Defined Radio</u> transmitter modules where software is used to ensure compliance of the device, technical description must be provided about how such control is implemented to ensure prevention of third-party modification; see KDB Publication 594280.	☐ - Provided in Separate Cover Letter	⊠ - N/A	
	<i>Details</i> : < N/A. >			
2.	For <u>Software Defined Radio (SDR)</u> devices, transmitter module applications must provide a software security description; see KDB Publication 442812.	☐ - Provided in Separate Cover Letter	□ - N/A	
	Details: <example -n="" a=""></example>			

Split Modular Requirements			
Requirement	Provided in Manual		
 For split modular transmitters, specific descriptions for secure communications between front-end and control sections, including authentication and restrictions on third-party modifications; also, instructions to third-party integrators on how control is maintained. 	☐ - Provided in Separate Cover Letter	□ - N/A	
Details: <example a="" n="" –=""></example>			

ModularApprovalRequestLetter

OEM Integration Manual Guidance – KDB 996369 D01 V02 Section 2			
Clear and Specific Instructions Describing the Conditions, Limitations, and Procedures for third-parties to use and/or integrate the module into a host device.			
Requirement			
•		□ - No,	
Is this module intended for sale to third parties?	⊠ - YES	If No, and LMA applies, the applicant ca make the following detailed info public. to be basic integration instructions for information below must still be inclu description. If the applicant wishes to ke this will require a separate statement comodule is not for sale to third partie instructions are internal confide	However there still needs a users manual and the ided in the operational eep this info confidential, over letter explaining the is and that integration
		al – See KDB 996369 D01 V02, Section 2	
As of May 1, 2019, the FCC requires ALL the following information to be in the installation manual. Modular transmitter applicants should include information in their instructions for all these items indicating clearly when they are not applicable. For example information on trace antenna design could indicate "Not Applicable". Also if a module is limited to only a grantees own products and not intended for sale to third parties, the user instructions may not need to be detailed and the following items can be placed in the operational description, but this should include a cover letter as cited above.			
 List of applicable FCC rules. K 	DB 996369 D01 V02, Section		
	ated to the transmitter.		
systems, professi	as limits on antennas, cable l onal installation info	loss, reduction of power for point to point	
3. Limited Module Procedures. KI			
limiting condition b. When RF exposu that compliance i	b. When RF exposure evaluation is necessary, state how control will be maintained such that compliance is ensured, such as Class II for new hosts, etc.		
a. Layout of trace d design verification confidential, the	a designs. KDB 996369 D01 V02, Section 2.5 Layout of trace design, parts list, antenna, connectors, isolation requirements, tests for design verification, and production test procedures for ensuring compliance. If confidential, the method used to keep confidential must be identified and information provided in the operational description.		
5. RF exposure considerations. KD		n 2.6	☐ - An LMA applies
a. Clearly and expli Two types of inst conditions (mobi	a. Clearly and explicitly state conditions that allow host manufacturers to use the module.
